About the Authors	xiii
About the Technical Reviewer	xv
Introduction	xvii
1 Flash 8 Overview	1
What's new in both versions of Flash 8	2
Bitmap caching	2
Bitmap smoothing	3
New curve algorithm	4
Gradient enhancements	4
Object Drawing model	5
Oval and Rectangle tool settings	6
Return of Normal Mode scripting	6
Improved strokes	7
TextField improvements	8
Security enhancements	8
SWF file metadata	9
Video improvements	9
Workspace enhancements	9
Exporting keyboard shortcuts as HTML	9
Library enhancements	10
Macintosh Document Tabs	10
Object-based Undo and Redo commands	11
Expanded stage pasteboard	11
XML-to-UI extensibility	11
New Flash Professional 8–specific features	11
Blend modes	11
Custom easing controls	12
Graphics effects filters	12
More TextField enhancements	13
More video improvements	14

CONTENTS

Improved video workflow	14
Alpha channel support	15
Embedded cue points	15
Stand-alone FLV encoder	16
FLV QuickTime Export plug-in	16
Advanced settings for On2 V6 video encoding	17
Flash mobile enhancements	17
Summary	18
2 Blending Modes	19
So, what, exactly, are blending modes?	20
Blending modes supported by Flash 8	21
Applying blends using the Flash 8 IDE	22
Normal mode	23
Darken mode	24
Multiply mode	24
Lighten mode	25
Screen mode	26
Overlay mode	26
Hard Light mode	27
Add mode	28
Subtract mode	28
Difference mode	29
Invert Mode	29
Applying Layer, Alpha, and Erase blending modes	30
Layer blending mode	30
Alpha mode: Creating soft masks	31
Erase mode	35
Applying blends using ActionScript	35
Summary	37
3 Filters	39
Filters available in Flash IDE	40
ActionScript filters	41
Applying filters using the Flash 8 IDE	41
Drop Shadow	42
Adding a drop shadow to dynamic text	42
Drop Shadow properties	44
Blur X and Blur Y	44
Color	44
Strength	45
Angle	45
Distance	45
Quality	46
Knockout	46
Inner Shadow	47
Hide Object	47

Blur filter	48
Glow filter	50
Bevel filter	52
Gradient Glow Filter	55
Gradient Bevel filter	57
Adjust Color filter	57
Applying filters using ActionScript	61
Applying the Blur filter with ActionScript	61
Casting dynamic Drop Shadows with ActionScript	65
Casting dynamic drop shadows with bevels	69
Displacement Map	73
The ColorMatrixFilter	80
The black and white icon rollover	82
Property reference for the ColorMatrixFilter	86
Convolution filter	86
Embossing example	88
Summary	92
4 Drawing and Graphic Improvements	93
Object drawing when drawing objects	94
Combining objects	96
Union	97
Intersect	98
Punch	98
Crop	98
Envelopes and object drawing	99
Greater image-loading support	102
Filling shapes with bitmaps	102
Enhancements to gradients	103
Color stops	103
Interpolation mode	103
Radial focal point	103
Spread modes	106
Reflect	107
Repeat	108
ActionScript with beginGradientFill()	108
Strokes of genius	110
Caps	110
Joins	111
Stroke hinting	113
Scale options	113
Changes to lineStyle()	114
Gradient strokes	115
Introducing lineGradientStyle()	119
Bitmap strokes	121
Summary	121

CONTENTS

5	Video: Alpha Channels and Other Improvements	123
	Overview of new video features	124
	The new ON2 VP6 codec	124
	Advanced video encoding options	124
	New stand-alone video encoder	125
	Video alpha channel support	125
	Embedded cue points	125
	New FLV component with skinning options	126
	Importing video	126
	Importing video using the Embed option	126
	Encoding video using progressive download and adding player skin	131
	Selecting a skin to be applied to your video	134
	Creating customized skins	135
	The stand-alone Flash 8 Video Encoder	136
	Encoding video using the Flash 8 Video Encoder	137
	Adding cue points in the encoding process	138
	Coding the FLVPlayback component	140
	The main ActionScript methods and properties	140
	Loading content	140
	Basic playback control	141
	General information and status	146
	Position and size	151
	Audio functionality	153
	Cue point functionality	155
	ActionScript cue points	158
	How Flash handles multiple video clips in one video player	159
	Playing multiple video clips in one video player	160
	An example including multiple videos	161
	Transitioning between videos	164
	Alpha in video	173
	Summary	182
6	TextField Improvements	183
	Saffron	184
	Text anti-aliasing	186
	Use device fonts	187
	Bitmap text (no anti-alias)	187
	Anti-aliasing for readability	187
	Anti-aliasing for animation	187
	Custom anti-aliasing (Flash Professional 8 only)	188
	ActionScript-based anti-aliasing	188
	Text object enhancements	189
	TextRenderer class	189
	TextFormat class	192
	TextField class	194
	TextField resizing	196
	Text layout API	197
	Summary	199

7	Speed Improvements	201
	Bitmap caching	202
	“Use your gift wisely, young Jedi”	203
	Properties and circumstances that cause bitmap regeneration	204
	Limits on bitmap caching	205
	Filters	206
	Loading external content	207
	Collision detection	208
	Cropping and scrolling with scrollRect	209
	The Rectangle class	211
	Using scrollRect to overcome size limits	212
	The Show Redraw Regions option	213
	Summary	214
8	The Wonderful World of BitmapData	215
	BitmapData: Creating images on the fly	216
	Creating a BitmapData instance	216
	Attaching an image from the library	219
	Taking a snapshot of a movie clip to use as BitmapData	221
	BitmapData: clean up after yourself	224
	BitmapData API	225
	Properties	225
	Methods	225
	loadBitmap	226
	draw	232
	getPixel	235
	getPixel32	237
	setPixel	237
	setPixel32	239
	colorTransform	239
	fillRect	242
	hitTest	243
	clone	244
	copyPixels	245
	copyChannel	247
	floodFill	249
	getColorBoundsRect	251
	scroll	252
	applyFilter	252
	generateFilterRect	253
	noise	255
	pixelDissolve	255
	Merge	255
	perlinNoise	256
	paletteMap	256
	threshold	257

CONTENTS

Using BitmapData to do some cool stuff	257
Making an image feel like a movie	257
Transitioning from one image to another	268
Changing the look of an image to suit a site style	276
Summary	287
9 Getting Creative with Filters, Masks, and Animation	289
Neon with Filters	290
Flashlights with alpha masks	294
Lightning bugs with custom easing	300
Flame with displacement maps	309
Tileable patterns with bitmap fills	319
Summary	328
10 External Interface	329
A simple example	331
The SWF	331
