Credits

Lead Editor **Assistant Production Director**
Chris Mills Kari Brooks-Copony

Technical Reviewers **Production Editor**
Kristian Besley and David Powers Kelly Winquist

Editorial Board **Composer**
Steve Anglin, Dan Appleman, Dina Quan
Ewan Buckingham, Gary Cornell,
Jason Gilmore, Jonathan Hassell,
James Huddleston, Chris Mills,
Matthew Moodie, Dominic Shakeshaft,
Jim Sumser, Matt Wade

Artist
Kinetic Publishing Services, LLC

Proofreader
Linda Seifert

Project Manager **Indexer**
Denise Santoro Lincoln Julie Grady

Copy Edit Manager **Cover Image Designer**
Nicole LeClerc Corné van Dooren

Copy Editors **Interior and Cover Designer**
Ami Knox and Nicole LeClerc Kurt Krames

Manufacturing Director
Tom Debolski

CONTENTS

About the Authors	xiii
About the Cover Image Designer	xv
Introduction	xvii
Chapter 1 Interactive Flash	1
Giving your movies instructions	2
Working with the Actions panel	3
Direct typing	7
Who are you talking to?	12
Controlling movie clips on the stage	12
Arguments	18
Listening to what your movies are telling you	20
Events in Flash	20
External events	21
Internal events	21
Introducing event handlers	22
Nesting spiders—argh!	22
Animating movie clips with ActionScript	25
Summary	27
Chapter 2 Making Plans	29
Defining the problem	30
Keep your ideas in a safer place than your head	32
Storyboarding	33
Building your ActionScript	36
Thinking from the top down	36
Thinking from the bottom up	38
Flowcharting	41
Book project: Introducing the Futuremedia site	44
Solving problem 1	49
Solving problem 2	50
Solving problems 3 and 4	54
Parting shots	56
Summary	56

CONTENTS

Chapter 3 Movies That Remember	59
Introducing variables	61
Values and types	62
Creating variables and using them with literals and expressions	63
Naming variables	63
Creating variables	65
Using literal values	66
Using expressions	67
Input and output	72
Using string expressions	78
Working with numbers	79
Other uses for numeric expressions	81
Working with Boolean values	82
Logic operators	83
Arrays	84
Reasons for using arrays	86
Arrays let you store related information together	86
Arrays let you hold information in a specific order	86
Arrays let you index information	87
Arrays let you link information	87
Creating a new array	87
Typing an array	89
Using variable values as offsets	89
Book project: Starting the Futuremedia site design	92
What you're going to do	92
What you're going to learn	93
Choosing and setting the stage size	93
Setting up the timeline	94
Creating layout guides	95
Adding the position and status text	97
Choosing a font	98
Adding the text	98
Embedding the font	101
Parting shots	102
Summary	103
Chapter 4 Movies That Decide for Themselves	105
Decision making	106
Making decisions in ActionScript: The if action	107
Defining a decision	110
Alternative actions	117
Acting on alternatives: The else action	118
More than one alternative: The else if action	119
Handling lots of alternatives: The switch action	123
Switching without breaks	126
Organizing your code in the correct order	136
Summary	136

Chapter 5 More Power, Less Script	139
Timeline loops	140
ActionScript loops	141
while loops	141
Useful things to do with while loops	142
for loops	152
init	153
condition	153
next	153
Some useful examples of for loops	154
Simple loop	154
Reverse loop	154
Two at a time	154
Looping through elements in an array	155
Applying an operation to all the elements in an array	155
Searching an array for a specific value	156
Cross-indexing a pair of arrays	157
Hangman	158
Book project: Creating the static graphics	172
Setting up the timeline layers for your graphics	174
Creating the back strip	174
Adding structure to the Library	176
Creating the frame cutout	178
Revealing the frame cutout and finishing the FLA	180
Parting shots	180
Summary	181
Chapter 6 Movies That Remember How to Do Things	185
Breaking down a task	186
Bundling actions and running them afterward	187
Using anonymous and named functions	187
Using functions to hide evil math	188
Using functions to take care of repetitive jobs	191
Choosing which actions to bundle and where	192
Arguments and redundancy	194
Local variables and modular code	195
Returning values from a function	198
Typing functions	200
Running in circles	202
Nesting functions	207
Using nested functions	208
Using more function nesting to tidy up your script	210
Book project: Creating the dynamic graphics	213
Summary	218

CONTENTS

Chapter 7 Objects and Classes	221
Introducing objects and classes	222
Type and object-oriented programming	224
Classes, generalization, and abstraction	224
Seeing arrays in a new light	225
The Array constructor method	225
Other Array methods	227
Array properties	229
Creating classes and objects (instances) in Flash	229
Instances	230
The Object object	230
Viewing an object in Flash	231
Constructors	232
Objects, objects, everywhere	236
Lurking objects	236
Making a show reel	238
Book project: Initializing the code	256
Getting yourself comfortable	257
Initializing the site variables	259
Telling ActionScript about the stage	260
Sanity check	263
Setting up your tricolor colors	264
Sanity check	265
Final words	267
Summary	267
 Chapter 8 Objects on the Stage	 269
Movie clips and buttons as objects	270
Symbol types and behaviors	273
Two sides of the same object	273
Working with Library items	274
Let chaos reign	279
Bitmap caching	281
The other side of bitmap caching	283
Bitmap caching and RAM	284
Changing the appearance of a cached movie clip	285
When to use bitmap caching	287
Referencing different timelines with ActionScript	287
Different place, different variable	287
Locating variables from inside an event handler function	288
Reusing handler functions	289
The apply method	293
Global variables	295
Summary	296

Chapter 9 Reusable Code and Realistic Movement	299
Breaking down big tasks into smaller ones	300
Black-box programming	301
Creating simple components	302
Creating a modular set of playback controls	303
Dark Valentine	311
Modular control of movie clips	314
How to simulate realistic movement	314
Motion with acceleration	316
Trailing the pointer (a mouse follower)	319
Understanding the inertial code	324
Fine-tuning the component	325
Function-based modular code	327
Swarming behavior	328
Taking the swarming effect forward	332
Creating tweens with ActionScript	332
Using import to access the Tween class	333
How to use the Tween constructor function	334
Understanding the transition types	335
Book project: Setting up the color transition	338
Making it modular	338
Sanity check #1	340
Sanity check #2	344
Running the FLA: The results	346
Parting shots	347
Summary	348
Chapter 10 Games and Sprites	351
What is a sprite?	352
Control	353
External and internal data	353
Movement	358
Collision	358
Planning zapper	365
The game world (the main timeline)	367
gSCREEN_TOP, gSCREEN_BOTTOM, gSCREEN_RIGHT, and gSCREEN_LEFT	368
score	368
level, skill, and accel	368
speed	368
shipDead, fired, and gSHIP_HEIGHT	368
The timeline	369

CONTENTS

The code	371
Global constants	371
The “start game” trigger	373
The player (the ship)	376
The SwarmAlien	380
alienSpawn()	381
onEnterFrame	381
alienBrain()	381
alienReincarnate()	382
The SwarmAlien code	383
The bullet	387
The debris of war	389
Book project: Navigation event handling	390
Sanity check #1	391
Adding the basic UI animation	391
navigate() and posTransition()	396
Adding typing	400
Sanity check #2	400
Creating a smooth transition	400
Parting shots	406
Summary	407
Chapter 11 Drawing API	409
Turtle graphics	410
Drawing lines	411
Drawing curves	416
How the sketching code works	421
Filling shapes	422
Creating a kaleidoscope	425
Kaleidoscope math	426
Building the kaleidoscope engine	427
Book project: Color transition event handling and data	435
Wiring the colTransition() function	435
The game plan	436
Fading color	437
Coding the color transition	438
Finishing the text transition	440
Reviewing the code so far	441
Data-driven sites (and why you need to understand them)	442
Defining data for Futuremedia	444
Parting shots	450
Summary	451

Chapter 12 Adding Sound to Flash	453
Choosing the right sound format	454
Using sound on a timeline	455
Using the ActionScript Sound class	458
Playing sounds from ActionScript	458
Attaching sounds to a sound instance	458
Starting and stopping sounds	462
Creating dynamic soundtracks	464
Using ActionScript to control volume and balance	469
Dealing with large sound files	476
Using compression to reduce download times	476
Loading sound from external files	478
Silence can also be golden	483
Summary	485
Chapter 13 Loading Dynamic Data with XML	487
XML 101	488
How an XML document is structured	490
Using the right version and encoding	492
Using non-English text with XML in Flash	492
Saving XML files in UTF-8	494
How tags are used in XML	496
Checking that your document is well formed	496
Loading XML into Flash	497
Book project: Controlling structure and content with XML	503
Building the basic XML structure	503
Loading the XML data into Flash	508
Creating the Futuremedia site's data structure	511
How the page array is structured	511
Populating the actual data values	513
Moving to the next level	517
Sanity check	521
Summary	522
Chapter 14 Finishing the Futuremedia Case Study	525
Getting the data into the user interface	526
Amending the way events are handled	530
Reading content pages	531
Adding the backward path	533
Making sure the UI knows where it needs to return	533
How the buildIcon() function works	536
Tidying up the user interface	540
A great big sanity check	544
Adding the status text messages	548
Adding a preloader	551
Loading your own content into the site	555
Parting shots	556
Summary	557

CONTENTS

Chapter 15 Advanced ActionScript: Components and Classes	559
Flash version 2 components	560
Getting more out of components with ActionScript	563
Components and event handling	565
How event listeners work	565
Adding an event listener	569
Understanding the advantages of event listeners	570
Commonly used components	572
Radio buttons	572
Check boxes	575
Combo boxes (drop-down menus)	576
Using code hints with components	583
Loading components at runtime	584
Removing components	586
Removing listeners	587
ActionScript and OOP	587
The future road map for ActionScript	588
Is OOP for me?	589
How class-based coding works	591
Extending classes	597
Extending a built-in class	600
Storing classes in a central location	602
Final thoughts	604
Index	607
