## Credits

**Lead Editor**      **Assistant Production Director**  
Chris Mills      Kari Brooks-Copony

**Technical Reviewer**      **Compositor**  
Todd Yard      Dina Quan

**Editorial Board**      **Artist**  
Steve Anglin, Ewan Buckingham,  
Gary Cornell, Jason Gilmore,  
Jonathan Gennick, Jonathan Hassell,      April Milne  
James Huddleston, Chris Mills,      **Proofreader**  
Matthew Moodie, Jeff Pepper,      April Eddy  
Paul Sarknas, Dominic Shakeshaft,      **Indexer**  
Jim Sumser, Matt Wade      John Collin

**Project Manager | Production Editor**      **Cover Image Designer**  
Laura Esterman      Corné van Dooren

**Copy Edit Manager**      **Interior and Cover Designer**  
Nicole Flores      Kurt Krames

**Copy Editors**      **Manufacturing Director**  
Nicole Flores, Ami Knox      Tom Debolski

## **PART ONE ACTIONSCRIPTED ANIMATION BASICS . . . . . 1**

<b>Chapter 1 Basic Animation Concepts</b> . . . . .	<b>3</b>
What is animation? . . . . .	4
Frames and motion . . . . .	5
Frames as records . . . . .	6
Programmed frames . . . . .	7
Dynamic vs. static animation . . . . .	7
Summary . . . . .	10
<b>Chapter 2 Basics of ActionScript 3.0 for Animation</b> . . . . .	<b>13</b>
Basic animation . . . . .	14
A note on ActionScript versions . . . . .	14
Classes and OOP . . . . .	15
A basic class . . . . .	15
Packages . . . . .	16
Imports . . . . .	17
Constructors . . . . .	17
Inheritance . . . . .	18
A MovieClip/Sprite subclass . . . . .	19
Creating your document class . . . . .	20

- Setting up an ActionScript 3.0 application . . . . . 21
  - Using the Flash CS3 IDE. . . . . 21
  - Using Flex Builder 2. . . . . 22
  - Using the free command-line compiler. . . . . 23
  - A note on tracing . . . . . 25
  - Scaling the movie . . . . . 26
- Animating with code . . . . . 27
  - Looping . . . . . 27
  - Frame loops . . . . . 30
  - Clip events . . . . . 31
  - Events and event handlers . . . . . 32
  - Listeners and handlers . . . . . 33
  - Events for animation . . . . . 36
- The display list. . . . . 37
  - Subclassing display objects. . . . . 40
- User interaction . . . . . 43
  - Mouse events . . . . . 43
  - Mouse position . . . . . 45
  - Keyboard events. . . . . 45
  - Key codes . . . . . 46
- Summary . . . . . 48
  
- Chapter 3 Trigonometry for Animation . . . . . 51**
  - What is trigonometry? . . . . . 52
  - Angles . . . . . 52
    - Radians and degrees . . . . . 53
    - Flash's coordinate system . . . . . 54
    - Triangle sides . . . . . 57
  - Trig functions . . . . . 57
    - Sine. . . . . 57
    - Cosine . . . . . 59
    - Tangent. . . . . 60
    - Arcsine and arccosine. . . . . 61
    - Arctangent. . . . . 61
  - Rotation . . . . . 63
  - Waves. . . . . 66
    - Smooth up and down motion . . . . . 67
    - Linear vertical motion . . . . . 69
    - Pulsing motion. . . . . 70
    - Waves with two angles . . . . . 70
    - Waves with the drawing API . . . . . 71
  - Circles and ellipses . . . . . 72
    - Circular movement . . . . . 73
    - Elliptical movement. . . . . 74
  - Pythagorean Theorem. . . . . 75
  - Distance between two points. . . . . 76

Important formulas in this chapter . . . . .	79
Calculate basic trigonometric functions . . . . .	80
Convert radians to degrees and degrees to radian . . . . .	80
Rotate to the mouse (or any point) . . . . .	80
Create waves . . . . .	80
Create circles . . . . .	80
Create ovals . . . . .	80
Get the distance between two points . . . . .	81
Summary . . . . .	81
<b>Chapter 4 Rendering Techniques . . . . .</b>	<b>83</b>
Colors in Flash . . . . .	84
Using hexadecimal color values . . . . .	84
Transparency and 32-bit color . . . . .	85
New number types: int and uint . . . . .	85
Combining colors . . . . .	86
Extracting component colors . . . . .	88
The Drawing API . . . . .	89
The graphics object . . . . .	90
Removing drawing with clear . . . . .	90
Setting line appearance with lineStyle . . . . .	91
Drawing lines with lineTo and moveTo . . . . .	91
Drawing curves with curveTo . . . . .	93
Curving through the control point . . . . .	94
Creating multiple curves . . . . .	95
Creating shapes with beginFill and endFill . . . . .	100
Creating gradient fills with beginGradientFill . . . . .	101
Specifying the fill type . . . . .	101
Setting the colors, alphas, and ratios . . . . .	102
Creating the matrix . . . . .	103
Color transforms . . . . .	105
Changing colors with the ColorTransform class . . . . .	105
Filters . . . . .	107
Creating a filter . . . . .	107
Animating filters . . . . .	109
Bitmaps . . . . .	111
Loading and embedding assets . . . . .	114
Loading assets . . . . .	114
Embedding assets . . . . .	115
Important formulas in this chapter . . . . .	116
Convert hex to decimal . . . . .	116
Convert decimal to hex . . . . .	116
Combine component colors . . . . .	117
Extract component colors . . . . .	117
Draw a curve through a point . . . . .	117
Summary . . . . .	117

**PART TWO BASIC MOTION . . . . . 119**

**Chapter 5 Velocity and Acceleration . . . . . 121**

- Velocity . . . . . 122
  - Vectors and velocity . . . . . 122
  - Velocity on one axis . . . . . 124
  - Velocity on two axes. . . . . 126
  - Angular velocity . . . . . 126
    - Vector addition . . . . . 128
    - A mouse follower . . . . . 129
  - Velocity extended . . . . . 130
- Acceleration . . . . . 132
  - Acceleration on one axis . . . . . 133
  - Acceleration on two axes . . . . . 135
  - Gravity as acceleration . . . . . 137
  - Angular acceleration. . . . . 139
  - A spaceship. . . . . 140
    - Ship controls . . . . . 142
- Important formulas in this chapter. . . . . 145
  - Convert angular velocity to x, y velocity. . . . . 145
  - Convert angular acceleration (any force acting on an object) to x, y acceleration . . . . . 145
  - Add acceleration to velocity . . . . . 145
  - Add velocity to position . . . . . 145
- Summary . . . . . 145

**Chapter 6 Boundaries and Friction . . . . . 147**

- Environmental boundaries . . . . . 148
  - Setting boundaries. . . . . 148
  - Removing objects . . . . . 150
  - Regenerating objects . . . . . 155
  - Screen wrapping . . . . . 157
  - Bouncing . . . . . 159
- Friction . . . . . 164
  - Friction, the right way. . . . . 165
  - Friction, the easy way . . . . . 167
  - Friction applied . . . . . 168
- Important formulas in this chapter. . . . . 169
  - Remove an out-of-bounds object . . . . . 169
  - Regenerate an out-of-bounds object . . . . . 169
  - Screen wrapping for an out-of-bounds object . . . . . 169
  - Apply friction (the correct way) . . . . . 170
  - Apply friction (the easy way) . . . . . 170
- Summary . . . . . 170

<b>Chapter 7 User Interaction: Moving Objects Around</b> . . . . .	<b>173</b>
Pressing and releasing a sprite . . . . .	174
Dragging a sprite . . . . .	177
Dragging with mouseMove . . . . .	177
Dragging with startDrag/stopDrag . . . . .	178
Combining dragging with motion code . . . . .	179
Throwing . . . . .	182
Summary . . . . .	186
<b>PART THREE ADVANCED MOTION</b> . . . . .	<b>187</b>
<b>Chapter 8 Easing and Springing</b> . . . . .	<b>189</b>
Proportional Motion . . . . .	190
Easing . . . . .	190
Simple easing. . . . .	191
When to stop easing. . . . .	195
A moving target . . . . .	198
Easing isn't just for motion . . . . .	199
Transparency . . . . .	199
Rotation . . . . .	200
Colors. . . . .	200
Advanced easing . . . . .	200
Springing . . . . .	201
Springing in one dimension. . . . .	201
Springing in two dimensions . . . . .	203
Springing to a moving target . . . . .	205
So where's the spring? . . . . .	205
Chaining springs . . . . .	207
Springing to multiple targets . . . . .	210
Offsetting the target. . . . .	213
Attaching multiple objects with springs . . . . .	215
Important formulas in this chapter. . . . .	218
Simple easing, long form . . . . .	218
Simple easing, abbreviated form . . . . .	219
Simple easing, short form. . . . .	219
Simple spring, long form . . . . .	219
Simple spring, abbreviated form . . . . .	219
Simple spring, short form. . . . .	219
Offset spring . . . . .	219
Summary . . . . .	220

**Chapter 9 Collision Detection . . . . . 223**

- Collision detection methods . . . . . 224
- hitTestObject and hitTestPoint . . . . . 224
  - Hit testing two sprites . . . . . 225
  - Hit testing a sprite and a point . . . . . 230
  - Hit testing with shapeFlag . . . . . 231
  - Summary of hitTest . . . . . 232
- Distance-based collision detection . . . . . 232
  - Simple distance-based collision detection . . . . . 232
  - Collision-based springing . . . . . 235
- Multiple-object collision detection strategies . . . . . 238
  - Basic multiple-object collision detection . . . . . 239
  - Multiple-object springing . . . . . 241
- Other methods of collision detection . . . . . 245
- Important formulas in this chapter . . . . . 245
  - Distance-based collision detection . . . . . 245
  - Multiple-object collision detection . . . . . 245
- Summary . . . . . 246

**Chapter 10 Coordinate Rotation and Bouncing Off Angles . . . . . 249**

- Simple coordinate rotation . . . . . 250
- Advanced coordinate rotation . . . . . 251
  - Rotating a single object . . . . . 252
  - Rotating multiple objects . . . . . 254
- Bouncing off an angle . . . . . 256
  - Performing the rotation . . . . . 258
  - Optimizing the code . . . . . 261
  - Making it dynamic . . . . . 263
  - Fixing the “falling off the edge” problem . . . . . 263
    - Hit testing . . . . . 263
    - Bounds checking . . . . . 264
  - Fixing the “under the line” problem . . . . . 265
  - Bouncing off multiple angles . . . . . 267
- Important formulas in this chapter . . . . . 272
  - Coordinate rotation . . . . . 272
  - Reverse coordinate rotation . . . . . 272
- Summary . . . . . 272

**Chapter 11 Billiard Ball Physics . . . . . 275**

- Mass . . . . . 276
- Momentum . . . . . 277
- Conservation of momentum . . . . . 277
  - Conservation of momentum on one axis . . . . . 279
    - Placing the objects . . . . . 282
    - Optimizing the code . . . . . 283

Conservation of momentum on two axes . . . . .	284
Understanding the theory and strategy . . . . .	284
Writing the code . . . . .	287
Adding more objects . . . . .	298
Solving a potential problem . . . . .	300
Important formulas in this chapter . . . . .	302
Conservation of momentum, in straight mathematical terms . . . . .	302
Conservation of momentum in ActionScript, with a shortcut . . . . .	302
Summary . . . . .	302
<b>Chapter 12 Particle Attraction and Gravity . . . . .</b>	<b>305</b>
Particles . . . . .	306
Gravity . . . . .	307
Gravitational force . . . . .	308
Collision detection and reaction . . . . .	310
Orbiting . . . . .	312
Springs . . . . .	313
Gravity vs. springs . . . . .	314
A springy node garden . . . . .	314
Nodes with connections . . . . .	317
Nodes with mass . . . . .	318
Important formulas in this chapter . . . . .	320
Basic gravity . . . . .	320
ActionScript-friendly gravity implementation . . . . .	320
Summary . . . . .	320
<b>Chapter 13 Forward Kinematics: Making Things Walk . . . . .</b>	<b>323</b>
Introducing forward and inverse kinematics . . . . .	324
Getting started programming forward kinematics . . . . .	325
Moving one segment . . . . .	325
Moving two segments . . . . .	328
Automating the process . . . . .	330
Building a natural walk cycle . . . . .	332
Making it dynamic . . . . .	334
Making it really walk . . . . .	338
Giving it some space . . . . .	338
Adding gravity . . . . .	338
Handling the collision . . . . .	339
Handling the reaction . . . . .	341
Screen wrapping, revisited . . . . .	342
Summary . . . . .	347

**Chapter 14 Inverse Kinematics: Dragging and Reaching . . . . . 349**

- Reaching and dragging single segments . . . . . 350
  - Reaching with a single segment . . . . . 350
  - Dragging with a single segment . . . . . 352
- Dragging multiple segments . . . . . 352
  - Dragging two segments . . . . . 352
  - Dragging more segments . . . . . 354
- Reaching with multiple segments. . . . . 357
  - Reaching for the mouse. . . . . 357
  - Reaching for an object . . . . . 363
  - Adding some interaction . . . . . 365
- Using the standard inverse kinematics method . . . . . 366
  - Introducing the law of cosines . . . . . 367
  - ActionScripting the law of cosines . . . . . 369
- Important formulas in this chapter. . . . . 372
  - Law of cosines . . . . . 372
  - Law of cosines in ActionScript . . . . . 372
- Summary . . . . . 372

**PART FOUR 3D ANIMATION . . . . . 373**

**Chapter 15 3D Basics . . . . . 375**

- The third dimension and perspective . . . . . 376
  - The z axis . . . . . 376
  - Perspective . . . . . 378
    - The perspective formula . . . . . 378
    - Perspective in ActionScript . . . . . 379
- Velocity and acceleration . . . . . 382
- Bouncing . . . . . 384
  - Single object bouncing . . . . . 384
  - Multiple object bouncing . . . . . 387
  - Z-sorting . . . . . 390
- Gravity. . . . . 392
- Wrapping . . . . . 395
- Easing and springing . . . . . 403
  - Easing . . . . . 403
  - Springing . . . . . 405
- Coordinate rotation . . . . . 407
- Collision detection . . . . . 414
- Important formulas in this chapter. . . . . 417
  - Basic perspective . . . . . 417
  - Z-sorting . . . . . 418
  - Coordinate rotation . . . . . 418
  - 3D distance. . . . . 418
- Summary . . . . . 418

<b>Chapter 16 3D Lines and Fills</b> . . . . .	<b>421</b>
Creating points and lines . . . . .	422
Making shapes . . . . .	428
Creating 3D fills . . . . .	432
Using triangles . . . . .	433
Modeling 3D solids. . . . .	438
Modeling a spinning cube. . . . .	439
Modeling other shapes . . . . .	441
Pyramid. . . . .	441
Extruded letter A . . . . .	442
Cylinder. . . . .	445
Moving 3D solids. . . . .	447
Summary . . . . .	449
<b>Chapter 17 Backface Culling and 3D Lighting</b> . . . . .	<b>451</b>
Backface culling . . . . .	452
Depth sorting. . . . .	455
3D lighting . . . . .	458
Summary . . . . .	469
<b>PART FIVE ADDITIONAL TECHNIQUES</b> . . . . .	<b>471</b>
<b>Chapter 18 Matrix Math</b> . . . . .	<b>473</b>
Matrix basics . . . . .	474
Matrix operations . . . . .	474
Matrix addition. . . . .	475
Matrix multiplication . . . . .	476
Scaling with a matrix . . . . .	476
Coordinate rotation with a matrix . . . . .	477
Coding with matrices . . . . .	478
The Matrix class . . . . .	480
Summary . . . . .	484
<b>Chapter 19 Tips and Tricks</b> . . . . .	<b>487</b>
Brownian (random) motion . . . . .	488
Random distribution. . . . .	492
Square distribution . . . . .	492
Circular distribution . . . . .	494
Biased distribution. . . . .	497
Timer- and time-based animation . . . . .	501
Timer-based animation . . . . .	502
Time-based animation. . . . .	505
Collisions between same-mass objects. . . . .	507
Integrating sound . . . . .	509

CONTENTS

---

- Useful formulas . . . . . 512
- Chapter 3 . . . . . 512
  - Calculate basic trigonometric functions . . . . . 512
  - Convert radians to degrees and degrees to radians . . . . . 512
  - Rotate to the mouse (or any point) . . . . . 512
  - Create waves . . . . . 512
  - Create circles . . . . . 513
  - Create ovals . . . . . 513
  - Get the distance between two points . . . . . 513
- Chapter 4 . . . . . 513
  - Convert hex to decimal . . . . . 513
  - Convert decimal to hex . . . . . 513
  - Combine component colors . . . . . 513
  - Extract component colors . . . . . 513
  - Draw a curve through a point . . . . . 514
- Chapter 5 . . . . . 514
  - Convert angular velocity to x, y velocity . . . . . 514
  - Convert angular acceleration (any force acting on an object)  
to x, y acceleration . . . . . 514
  - Add acceleration to velocity . . . . . 514
  - Add velocity to position . . . . . 514
- Chapter 6 . . . . . 514
  - Remove an out-of-bounds object . . . . . 514
  - Regenerate an out-of-bounds object . . . . . 515
  - Screen wrapping for an out-of-bounds object . . . . . 515
  - Apply friction (the correct way) . . . . . 515
  - Apply friction (the easy way) . . . . . 515
- Chapter 8 . . . . . 516
  - Simple easing, long form . . . . . 516
  - Simple easing, abbreviated form . . . . . 516
  - Simple easing, short form . . . . . 516
  - Simple spring, long form . . . . . 516
  - Simple spring, abbreviated form . . . . . 516
  - Simple spring, short form . . . . . 516
  - Offset spring . . . . . 517
- Chapter 9 . . . . . 517
  - Distance-based collision detection . . . . . 517
  - Multiple-object collision detection . . . . . 517
- Chapter 10 . . . . . 517
  - Coordinate rotation . . . . . 517
  - Reverse coordinate rotation . . . . . 518
- Chapter 11 . . . . . 518
  - Conservation of momentum, in straight mathematical terms . . . . . 518
  - Conservation of momentum in ActionScript, with a shortcut . . . . . 518
- Chapter 12 . . . . . 518
  - Basic gravity . . . . . 518
  - ActionScript-friendly gravity implementation . . . . . 518
