CONTENTS

About the Author	xiii
About the Technical Reviewer	xv
About the Cover Image Designer	xvii
Acknowledgments	xix
Introduction	xxi
Chapter 1 Introducing LiveCycle Designer	1
Overview of form types	2
Static forms	2
Interactive forms	3
Dynamic forms	4
Industry uses	5
Graphic designers	5
Web designers/developers	6
Data architects	6
Understanding the PDF and XDP formats	6
The PDF format	6
The XDP format	7
The LiveCycle Designer ES interface	8
The designer workspace	11
Palettes	12
The default palettes	14
Layout Editor	16
Design View tab	16
Master Page tab	18
Preview tab	18
Script Editor	18
Using menus and commands	19
Keyboard shortcuts	20
Creating your first form	22
New Form Assistant	22
Summary	26

Chapter 2 Understanding Forms and Design 29

Creating a design flow	30
Concept and planning	30
Design and build	30
Quality assurance testing.	30
Deployment and implementation	30
Implementing the design flow of your form	31
Designing forms to be filled out.	34
Principles of form design.	34
Simplicity and openness lead to completion.	34
Consistent layouts guide users through a form	36
Grouping information in tables	37
Aesthetics impact form usability.	39
Useful design tips	40
Structure questions according to importance	40
Smart defaults ensure consistent data formatting.	42
Use spatial relationships to your advantage	42
Emphasize important actions	42
The effect of typography on forms	43
Impact of typography on successful forms.	44
Understanding graphic design in forms.	45
Developing forms for people	45
User needs.	45
Computers format data, users enter it.	46
Mark mandatory fields clearly	46
Designing accessible forms.	47
Tips for designing accessible forms.	47
Designing forms for screen readers	47
Data-handling needs.	50
Overview of data validation	51
Ensuring data security.	52
Security via digital signatures	52
Using PDF security settings	53
Setting passwords for security	54
Privacy	54
Summary.	55

**Chapter 3 Understanding the Elements of Form Style:
Components, Templates, and Masters 57**

Understanding objects	58
Investigating the Object Library palette	59
My Favorites category	59
Standard category	60
Custom category	62
Barcodes category	63
Understanding content areas	64
Editing content area in master pages	64

Replicating design across multiple projects with templates	66
Understand the role of the Template Manager	67
Using the Template Manager	71
Importing a template into the Template Manager.	72
Defining a consistent look with master pages	73
Fragments	74
Learning about body pages.	75
Summary	76
Chapter 4 Learning the Fundamentals of Designing Forms	79
Creating, opening, saving forms	79
Creating and opening forms	80
Saving forms	80
Working with the Template Manager	81
Using the Template Manager menu.	81
Working with existing templates	83
Working with form properties, information, defaults, and options.	84
Information tab	85
Defaults tab	86
Performance tab	86
PDF Security tab	87
Printing Options tab	87
Compatibility tab	88
Preview tab	88
Save Options tab	89
Form Variables tab	89
Working with master and body pages.	90
Adding master pages	90
Editing master pages	91
Using body pages in your form	93
Adding and deleting body pages	93
Renaming body pages	93
Renaming body pages in the Hierarchy palette	93
Renaming body pages in Design View	94
Moving between and reordering body pages	94
Moving between body pages	94
Reordering body pages	94
Setting the tabbing order	94
Manipulating objects	99
Inserting objects	99
Moving objects	103
Resizing objects	104
Aligning objects	105
Grouping objects	106
Summary	107

Chapter 5 Understanding Interactive Forms	109
Designing interactive forms.	110
Exploring types of interactive objects	110
Working with custom interactive objects	110
Adding a group to the Object Library palette	110
Creating a custom object	111
Adding calculations and scripts.	113
Working with the Script Editor.	114
Understanding events.	115
Understanding calculations.	117
Using FormCalc in calculations	117
Using JavaScript in calculations	120
Using field objects in your form design	120
Using a Date/Time object.	120
Investigating the Value tab	121
Creating interactive buttons	122
Submitting data via an email submit button	122
Understanding an HTTP submit button	123
Understanding a print button	124
Understanding a reset button	124
Editing buttons in your form design.	124
Understanding image objects and image fields.	125
Using image objects	125
Using image fields	127
Summary	129
Chapter 6 Getting into Advanced Form Design	131
Controlling user input and data display	132
Formatting and validating user input	132
Specifying validation on a Text Field object	132
Specifying validation and formatting on a Numeric Field object.	134
Applying display and edit patterns.	135
Exploring types of patterns	136
Setting and using locale information	136
Specifying a locale for an object	141
Scripting form interactions	141
Creating conditional form interactions	141
Understanding conditional breaks.	145
Working with flowed form layouts.	147
Understanding subforms	147
Using subforms in dynamic forms	147
Using tables	148
Creating nested tables	148
Creating dynamic tables	150

Creating shared and reusable form content	157
Creating and using custom objects	158
Using form fragments	159
Creating a fragment from a Text Field object	159
Inserting a fragment into a form design	161
Editing a form fragment	164
Using global field bindings	165
Summary	167
Chapter 7 Using External Files in Your Form	169
Designing XML relationships in LiveCycle Designer	170
Connecting to an XML schema	171
Implementing XML Schemas in LiveCycle	171
Creating data binding with an XML data file	173
Using WSDL files in your form design	179
Connecting your form to a WSDL file	179
Using WSDL files to create forms that dynamically return information	182
Differentiating kinds of data binding	185
Importing forms from other programs	186
Importing PDFs	186
Working with Word files	187
Importing a Word file	188
Importing Adobe Output Server files	190
Mapping fonts and characters	190
Font mapping	190
Summary	190
Chapter 8 Performing Advanced Form Scripting	193
About scripting in LiveCycle Designer	194
Events make things happen	196
Types of events	196
Process events	197
Interactive events	197
Application events	198
Using statement completion in the Script Editor	199
Adding spreadsheets using FormCalc	200
Using the built-in FormCalc functions	200
Creating custom calculations with FormCalc	201
Adding a world of automation using JavaScript	205
Using JavaScript to automatically populate a value from a drop-down list	206
Showing and hiding fields using JavaScript	210
Highlighting contact information with JavaScript	214

- Separating form and function: Creating a Script object 218
 - Debugging and troubleshooting calculations and scripts using the Report palette 221
 - Using the Warnings tab of the Report palette 221
 - Using the Binding tab of the Report palette 222
 - Using the Log tab of the Report palette 222
- Summary 223

- Chapter 9 Completing Your Forms with Data Submission 225**
 - The overwhelming importance of security 225
 - The all-important submission button 226
 - Customizing generic buttons 226
 - So, just what is the Submit tab? 228
 - The Submit to URL field 229
 - Submit As as drop-down list 229
 - Email Submit Button objects 230
 - Email Submit Button settings overview 231
 - Using the HTTP Submit Button object 233
 - Understanding the HTTP Submit Button object's settings. 233
 - Implementing types of submission buttons 236
 - Buttons that send e-mail with XML 236
 - Buttons that send information to a server 240
 - Buttons that add a digital signature 243
 - Summary 245

- Index 247**
